

kepler::Circle::operator()

kepler::ArrayPrinter
::operator()

kepler::number_to_string

```
graph LR; A[kepler::Circle::operator()] --> C[kepler::number_to_string]; B[kepler::ArrayPrinter::operator()] --> C;
```

The diagram illustrates two function pointers on the left pointing to a common target on the right. The top pointer is labeled 'kepler::Circle::operator()' and the bottom pointer is labeled 'kepler::ArrayPrinter::operator()'. Both arrows point to a gray box labeled 'kepler::number_to_string'.
